FEED

www.ang.com

Scope reg. 767/2009

The Regulation lays down rules on the placing on the market and use of feed for both food-producing and non- food producing animals within the Community, including requirements for labeling, packaging and presentation.

feed materials

products of vegetable or animal origin, whose principal purpose is to meet animals' nutritional needs, in their natural state, fresh or preserved, and products derived from the industrial processing thereof, and organic or inorganic substances, whether or not containing feed additives, which are intended for use in oral animal-feeding either directly as such, or after processing, or in the preparation of compound feed, or as carrier of premixtures;

Community Catalogue of feed materials

Commission Regulation (EU) No 68/2013 of 16 January 2013 on the Catalogue of feed materials

1. Cereal grains and products derived thereof;
2. Oil seeds, oil fruits, and products derived thereof;
3. Legume seeds and products derived thereof;
4. Tubers, roots, and products derived thereof;
5. Other seeds and fruits, and products derived thereof;
6. Forages and roughage, and products derived thereof;
7. Other plants, algae and products derived thereof;
8. Milk products and products derived thereof;
9. Land animal products and products derived thereof;
10. Fish, other aquatic animals and products derived thereof;
11. Minerals and products derived thereof;
12. Fermentation (by-)products from micro-organisms;
13. Miscellaneous.

PART C

List of feed materials

1. Cereal grains and products derived thereof

Number	Name	Description	Compulsory declarations
1.1.1	Barley	Grains of <i>Hordeum vulgare</i> L. It may be rumen protected	
1.1.2	Barley, puffed	Product obtained from milled or broken barley by means of a treatment in humid, warm conditions and under pressure	Starch
1.1.3	Barley, roasted	Product of barley roasting process which is partially roasted with low colour	Starch, if > 10 % Crude protein, if > 15 %
1.1.4	Barley flakes	Product obtained by steaming or infra red micronising and rolling dehusked barley. It may contain a small proportion of barley husks. It may be rumen protected.	Starch
1.1.5	Barley fibre	Product of barley starch manufacture. It consists of particles of endosperm and principally of fibre.	Crude fibre Crude protein, if > 10 %
1.1.6	Barley hulls	Product of ethanol-starch manufacture after dry milling, screening and dehulling of barley grains	Crude fibre Crude protein, if > 10 %

Ten plik jest zgodny ze standardem PDF/A i został otwarty w trybie „tylko do odczytu” celem uniemożliwienia wprowadzania modyfikacji.

	processing of plants (*)	whole plants or their parts.	
13.1.8	Products from processing of spices and seasonings ⁽¹⁾	Products obtained from freezing or drying spices and seasonings or their parts.	Crude protein, if > 10 % Crude fibre Crude oils/fats, if > 10 %, Starch, if > 30 % Total sugar, calculated as sucrose, if > 10 %
13.1.9	Products from the processing of herbs ⁽¹⁾	Products obtained from crushing, grinding, freezing or drying herbs or their parts.	Crude Fibre
13.1.10	Products from the potato processing industry	Products obtained when processing potatoes. They may have been dried or frozen.	Starch Crude fibre Crude fat, if > 5 % Ash insoluble in HCl, if > 3,5 %
13.1.11	Products and by-products of the sauces production	Substances from the sauces-production that are intended or where it is reasonable to expect that they can be consumed by humans in their processed, partially processed or unprocessed forms. They may be dried.	Crude fat
13.1.12	Products and by-products from the savoury snacks industry	Products and by-products of the savoury snacks industry obtained during and from the production of savoury snacks — potato chips, potato and/or cereal based snacks (direct extruded, dough based and pelleted snacks) and nuts.	Crude fat

Reg. (WE) No1831/2003

feed additives' means substances, micro-organisms or preparations, other than feed material and premixtures, which are intentionally added to feed or water in order to perform, in particular, one or more of the functions

Category of feed additives:

technological additives - any substance added to feed for a technological purpose: *preservatives, antioxidants, emulsifiers, stabilisers, gelling agents, binders, ect*

sensory additives- any substance, the addition of which to feed improves or changes the organoleptic properties of the feed, or the visual characteristics of the food derived from animals: *colourants, flavouring compounds* ;

nutritional additives vitamins, pro-vitamins and chemically well-defined substances having similar effect, *compounds of trace elements, amino acids, their salts and analogues, urea and its derivatives*;

zootechnical additives: any additive used to affect favourably the performance of animals in good health or used to affect favourably the environment: *digestibility enhancers, gut flora stabilisers, substances which favourably affect the environment, other zootechnical additives*;

coccidiostats and histomonostats.

Compound feed - a mixture of at least two feed materials, whether or not containing feed additives, for oral animal-feeding in the form of complete or complementary feed

complete feed

means compound feed which, by reason of its composition, is sufficient for a daily ration

complementary feed

means compound feed which has a high content of certain substances but which, by reason of its composition, is sufficient for a daily ration only if used in combination with other feed

mineral feed means complementary feed containing at least 40 % crude ash

Feed may only be placed on the market and used if

- it is safe;
- it does not have a direct adverse effect on the environment or animal welfare
- is sound, genuine, unadulterated, fit for its purpose and of merchantable quality;
- is labeled, packaged and presented in accordance with the provisions laid down in this Regulation and other applicable Community legislation

COMPLETE FOOD FOR DOG

COMPOSITION: product of animal origin, fish (of which salmon 16%), vegetable oil and fat

ANALILICAL CONTITUENTS (%):
moisture 80, crude protein 9,5, crude oil and fat 6,5, crude ash 3, crude fibre 0,3;

ADDITIVES PER KG: vitamin A 2000, vitamin D3 200 I.U., vit. E (alpha-tocopherol content 91%) 20mg, Cu (coper sulphate pentahydrate) 0,1mg

MINIMUM SHELF-LIVE AND BATCH NUMBER: see on the can bottom

PRODUCTION DATE: produced 24 months prior to the expiry date stated on the bottom

FEEDING GUIDE: feed is ready for use and must be served at room temperature. Once open, keep in the fridge

RECOMENDATION DAILY SERVING:

Specific mandatory labelling requirements for compound feed – cont.

- the indication of the minimum storage life in accordance with the following requirements:
 - “use before ...” followed by the date indicating a certain day in the case of feed highly perishable due to degradation processes;
 - “best before ...” followed by the date indicating a certain month in the case of other feed.

If the date of manufacture is indicated on the label, the date indicating minimum storage life may be provided as well as (time period in days or months) after the date of manufacture’;

The numeric indication of dates shall follow the order of day, month and year and the format shall be indicated on the label by means of the following abbreviation: ‘DD/MM/YY’.

Claims

The labelling and the presentation of feed may draw particular attention:

- to the presence or the absence of a substance in the feed;
- to a specific nutritional characteristic or process or
- to a specific function related to any of the above effects

Art. 13 (1) Reg. (EC) No 767/2009

Claims

The competent authorities can request that the person responsible for the labelling provides evidence of the scientific substantiation of the claims.

Suitable evidence can be

- ☐ **publicly accessible scientific knowledge or**
- ☐ **documented company-internal research results.**

Art. 13 (1) Reg. (EC) No 767/2009

Claims

The following examples are not very conclusive, e.g.:

- **Declarations from manufacturers or importers,**
 - **Statements from individual persons,**
 - **Statements from stakeholder bodies,**
 - **Official certificates of marketability or**
 - **Quality certificates**
- without evidence of a scientific substantiation.**

Claims

The following examples can be considered as evidence of scientific substantiation:

- **Specialised scientific articles and studies (orientated on the Guideline*) for proving the efficacy of additives),**
- **Extracts from specialist books,**
- **Expert opinions,**
- **Official statements (e.g. EFSA) or**
- **Tests by independent organizations and research institutes.**

Thank you for your attention !
