Technical Textiles

Who we are

Beaulieu Technical Textiles (BTT), member of the Beaulieu International Group, is an established leader and driving force in the global market of technical textiles.

BTT combines a pioneering spirit with hands-on expertise. Its dedicated line-up of benchmark products is engineered to provide a tailored and high-tech response to present and future trends and demands. The result: a range of solutions that demonstrate exceptional quality and durability.

BTT represents the cutting edge in the customer-oriented and market-specific production of polymer textiles. Its name has become a mark of excellence in the fields of carpet backings, agrotextiles, geotextiles, packaging and building textiles.

Covering different markets and applications, BTT remains true to its creed of: Envisioning Solutions. Vouching for Quality.

Automotive | Packaging | Geotextiles | Construction | Landscaping | Agriculture

CECOTEC

Chemin des Maraudeurs, 6
4910 THEUX
Tel : 32-(0)87703887
info@cecotec.eu
www.cecotec.eu

Mr Philippe DUMOULIN
info@cecotec.be

HISTORY

With close to twenty years experience in non-chemical weed control equipment, the company started out by importing thermal and mechanical weed control equipment and over the last twenty years has developed and now manufactures eco-friendly weed control tools.

Cecotec is based in Theux in Belgium and we acquired it in 2016.

We present several products for alternative weed control. ZERO PHYTO, ECOLOGIQUE. These tools enable thermal and/or mechanical weed management.

We also have some specific tools for gardening and truck farming for the purpose of gently working the land without excessive effort.

MADE IN BELGIUM!

We are based in Wallonia and most of our tools are designed in our workshop in THEUX where we manufacture them entirely from start to finish!

In this way we are open to any suggestions on how to improve existing tools but also any ideas for new tools we could design and adapt based on the needs expressed.

Old tools can also be updated, reinvented, reinterpreted... and new ideas are always welcome.

Project management from initial idea to product ready for series production

Our activity is based on comprehensive technical know-how in processing plastic, from mould making to injection machines.

We design and build components "according to the rules of the plastics trade" for our customers, make the corresponding moulding tools in our workshop, and produce the articles in the injection moulding department.

Our range of "garden tools" consists largely of plastic rakes.
These tools have proven their worth for many years in hay and garden work.

EMC - Electronic Meter Connect

The EMC provides a fast and accurate digital measurement of your trees. Perfectly suited to forest owners or managers seeking to save time in their forest inventories and tree scaling, as well as to optimize their forest management in a sustainable manner.

TPM - Tree Parameters Measuring

The TPM is the most advanced tree measurement tool up to now. Developed for professional forest managers, simply scan your trees to get multi-parameters and therefore achieve the greatest forest management efficiency and precision.

COMPANY

The focus at Peter Müller GmbH is the processing of the raw material wood. Whether for fencing & gate construction, the production of posts for fruit-growing and viticulture or the manufacture of wood frame constructions. We use state-of-the art design, production and impregnation methods and provide service from initial no-obligation consulting through to on-site assembly.

On request we will also perform joinery and impregnation work for third-party suppliers.

The more than 30-year history of our company demonstrates:
High-quality wood – correctly processed – guarantees lasting quality. For decades.

WHAT WE DO

We devise, measure up, and build customised industrial cooling solutions and take care of maintenance, thus keeping the installation in excellent shape.

FRUIT

For over 30 years we have been designing conditioned refrigerators for the storage of fruit (apples, pears, mangoes ...). Constructing freezing tunnels and deep freezers is right up our alley too. Last but not least: for the storage of cherries we build hydro coolers that vaporise ice water over the cherries, reducing their temperature to 4°C in less than ten minutes. A stunning piece of engineering – unique to us in Belgium and beyond!

VEGETABLES

We build refrigerators for the storage of vegetables for different types of farmers and storage depots of chain stores. Think about potatoes, carrots, seed potatoes, and onions.

DAIRY

From production areas for cheese processing and conditioned ripening rooms to installations for cooling milk and dairy products: we offer customized solutions.

Tel : 32-(0)61277379
info@altitude500.com
www.altitude500.com

Mr Louis BRASSEUR
info@altitude500.com

PRESENTATION & BACKGROUND

Operating on the Christmas tree market for over 30 years, Altitude 500 is now a key player in this sector, selling over 700,000 trees in 2011 to earn the company a top-five ranking in Europe. Headed by Louis Brasseur, the managing director, this family-run business remains a people-sized entity that is constantly seeking to improve customer satisfaction. The trees are produced on a 450-hectare site located in the centre of the Belgian Ardennes. The company is able to cope with all demands irrespective of the volumes thanks to the various partnerships it has forged throughout Europe.

QUALITY, EFFICIENCY & A PERSONAL TOUCH

A quality product because Altitude 500 does its utmost to ensure the highest standards are applied when producing our trees. A specialist team works throughout the year to ensure the trees are as looked after as well as possible. The team plays a key role in the company because it needs to operate according to the highest tree nursery principles so our customers can count on trees that are a cut above all the others.

An efficient administrative follow-up. Our administrative officer, Pascal Bauvir, has been involved with the company since the very early days. He makes sure requests are dealt with promptly and sees to it the logistical process is working smoothly during the peak season. A rapid response is of key importance in our business.

A personal touch in the service we provide. We are lucky to be able to enjoy the custom of international companies to underpin our high sales volume but it is crucial for us to grant the same importance to all our customers irrespective of their size. After all, customer satisfaction is where the success story begins! We are able to offer you all the varieties available on the Christmas tree market in an assortment of packaging formats.

CHRISTMAS TREES

We spend most of our activities on Christmas trees, and we have been specialists in the field for more than three decades now.

We grow firs starting from the seed, and we can provide different kinds of tree species, from the smallest sizes up to 65 feet high. They come for the most part from our production.

We always make a professional selection according to your choice of tree qualities.

FIR SPECIES :

SPRUCE – NORDMANN – FRASERI – PUNGENS - CONCOLOR

René Nicolai fruit tree nursery is a national and international well-established company in the world of fruit industry. The fruit tree nursery has an annual production of approximately 1,200,000 rootstocks and 1,000,000 fruit trees of which 70% apple trees, 20% pear trees and 10 % cherry trees. The assortment is completely attuned to modern, Western European fruit culture and satisfies the norms of the European market. The products find their way to the majority of European countries and even further.

Over 50 years of premier quality

Based in Nieuwerkerken in the Belgian province of Limburg, Carolus Trees has been a leading player on the market of tree nurseries in its home country for many years. Producing well over 2 000 000 apple and pear trees a year, nowadays Carolus Trees supplies fruit growers across Europe and Central Asia. The business is also planning trials in South Africa and Chile. Over 85% of the trees are intended for export.
