[m.chauvier@agrimat.com](mailto:m.chauvier@agrimat.com)  
[www.agrimat.com](http://www.agrimat.com)

Mr Christophe GACHET  
[contact@agrimat.com](mailto:contact@agrimat.com)

**A family-run business AGRIMAT has been manufacturing and marketing top-quality farm equipment in Europe and elsewhere for a quarter of a century now.**

AGRIMAT specialises in stockfarmers' equipment: manure spreaders, liquid manure tanks, water bowsers, dung spreading harrows, field aerators, tubular equipment for cattle barns ...

The entity's manufacturing activities are carried out at the Bièvre industrial estate, Belgium, close to all the major European transport routes. Covering 50,000 m<sup>2</sup>, the AGRIMAT company boasts 20,000 m<sup>2</sup> of manufacturing, assembly and loading premises. The spare parts store can promptly supply any parts customers might need.

The qualified members of the AGRIMAT team of staff use their expert knowledge of the products to live up to customers' expectations. Attentive to the needs of its customers, AGRIMAT is now adapting its range of wine-growing equipment and equipment for institutions. In order to cater for its customers' needs, AGRIMAT manufactures and markets new 3-point mounted dumpsters, dumpsters with easy evacuation openings, log splitters particularly suitable for farming activities and forestry operations. The standard by which others are judged, AGRIMAT is a symbol of quality, resilience, reliability and ease of use.

**ANATIS**

Avenue Général Michel, 1/E  
6000 CHARLEROI  
Tel : 32-(0)495299989  
[fx.geubel@anatis.be](mailto:fx.geubel@anatis.be)  
[www.anatis.be](http://www.anatis.be)

Mr François-Xavier GEUBEL  
[fx.geubel@anatis.be](mailto:fx.geubel@anatis.be)

Anatis is an industrial package-builder made up of about ten motivated shareholders, whose ambition is to become a leader in Belgium for small and medium power **agricultural biomethanation** units (from 10 electrical kilowatts for small units up to between 100 and 1,000 electrical kilowatts for medium-sized units). The objective is to offer standardized installations of professional quality, irrespective of the power supplied. In addition, Anatis accompanies operators throughout the process: from preparing files, and commissioning installations, through to normal operation, it offers them both essential advice and monitoring for the different parameters that guarantee permanent trouble-free operation. This is what makes Anatis different from other entrepreneurs.

Anatis makes everybody's dream come true: no longer having to depend on fossil energy and no longer being haunted by its perpetually increasing costs. Anatis offers every farmer, every industrialist and every urban district the possibility of becoming as autonomous as possible for their electricity and

heating requirements. Biomethanation offers an energy source that is sure, reliable and, above all, independent of weather conditions 365 days a year!

**BEAULIEU TECHNICAL TEXTILES**

Boulevard Industriel, 3  
7780 COMINES-WARNETON  
Tel : 32-(0)56560670

Mr Michel SPEELEVELD  
[michel.speeleveld@bintg.com](mailto:michel.speeleveld@bintg.com)

**Who we are**

Beaulieu Technical Textiles (BTT), member of the Beaulieu International Group, is an established leader and driving force in the global market of technical textiles.

BTT combines a pioneering spirit with hands-on expertise. Its dedicated line-up of benchmark products is engineered to provide a tailored and high-tech response to present and future trends and demands. The result: a range of solutions that demonstrate exceptional quality and durability.

BTT represents the cutting edge in the customer-oriented and market-specific production of polymer textiles. Its name has become a mark of excellence in the fields of carpet backings, agrotextiles, geotextiles, packaging and building textiles.

Covering different markets and applications, BTT remains true to its creed of: Envisioning Solutions. Vouching for Quality.

**Applications**

Automotive | Packaging | Geotextiles | Construction | Landscaping | Agriculture

### **We are BouMatic**

We provide innovative solutions that help dairy farmers be more profitable, while safeguarding animal welfare.

Founded on a strong heritage of innovation and technical leadership, we deliver the future of productivity to dairy farms across the globe. Based on generations of experience, global R&D expertise and an intimate knowledge of the needs of local dairy businesses, our solutions answer tomorrow's challenges.

### **Global reach**

Our commitment to innovation, quality and dairy excellence has made us a leader in the field. Through our extensive global distribution network, both small and large-scale dairy businesses worldwide benefit from our expertise and full range of milking products.

- Bulk cooling tanks
- Automated milking systems
- Robotic milking systems
- Full line of sanitation products
- Route service products
- Integrated computerized management

[www.cecotec.eu](http://www.cecotec.eu)

Mr Philippe DUMOULIN

[info@cecotec.be](mailto:info@cecotec.be)

## **HISTORY**

With close to twenty years experience in non-chemical weed control equipment, the company started out by importing thermal and mechanical weed control equipment and over the last twenty years has developed and now manufactures eco-friendly weed control tools.

Cecotec is based in Theux in Belgium and we acquired it in 2016.

We present several products for alternative weed control. ZERO PHYTO, ECOLOGIQUE. These tools enable thermal and/or mechanical weed management.

We also have some specific tools for gardening and truck farming for the purpose of gently working the land without excessive effort.

## **MADE IN BELGIUM!**

We are based in Wallonia and most of our tools are designed in our workshop in THEUX where we manufacture them entirely from start to finish!

In this way we are open to any suggestions on how to improve existing tools but also any ideas for new tools we could design and adapt based on the needs expressed.

Old tools can also be updated, reinvented, reinterpreted... and new ideas are always welcome.

**KAB//Seating**

KAB Seating is the global market leader for off-highway seating systems that include air, mechanical and active suspension development and product innovation.

### **Applications**

KAB seats have been designed and developed for a wide range of applications including Agriculture, Construction and Material Handling vehicles. Our suspension seats have been designed with the operator in mind, providing an easy fit, durable solution that maintains comfort and support in cab.

KAB seats play a vital role in protecting the operator from harmful vibrations that they would otherwise experience from working for long periods and carrying out their activities over rough terrain.

Select your application and vehicle type from the below categories to find your next KAB seat.

**LECHLER**

Avenue Mercator, 6  
1300 WAVRE  
Tel : 32-(0)10225022  
[info@lechler.be](mailto:info@lechler.be)  
[www.lechler.com](http://www.lechler.com)

Mr Marc OURY

**Business division Agriculture**

Plant cultivation, surface care and container cleaning – Lechler offers suitable and approved nozzles for almost every application in agricultural engineering. Our motto: Achieving the best results with minimal effort in the shortest possible time.

When it comes to plant cultivation, Lechler atomising nozzles ensure optimum plant protection and precise application of liquid fertilisation - with maximum drift reduction and application quality. National and international regulations must be considered as well as biological and ecological aspects. When it comes to surface care, Lechler nozzles make public green spaces and traffic surfaces attractive and usable - with the least possible use of agents with weed control, pest control and de-icing. When cleaning containers, Lechler cleaning nozzles are available for fast, efficient cleaning, stirring and flushing.

Mr Stéphane RUBBERS  
[stephane.rubbers@lessinesindustries.com](mailto:stephane.rubbers@lessinesindustries.com)

### **ABOUT US**

Lessine differentiates itself with the considerable know-how and more than 125 years' experience in design, development, construction and installation of machines in bulk product industry. We are experts in five major techniques in this sector: milling, mixing, handling, screening and drying.

For each technique, Lessine has developed a wide range of machines that we adjust to your application. With a fully equipped testing room, the Lessine team manages conducting tests on a semi-industrial scale prior to order to guarantee the performance of the future installation and predict its wear conditions.

And because we believe that a small detail is capable of making all the difference, we offer our clients the tailor-made solution par excellence. Our service offering varies depending on your needs; it covers the installation of individual equipment or the implementation of a complete all-round solution.

Our tailor-made solutions take into consideration

- The requirements of your project: technique, dimensions, investment, cost, construction ...
- Your specific needs: transport, automation, installation, commissioning, spare parts ...
- From the design stage > R&D, development, test and feasibility.

## UNISENSOR

Rue Louis Plescia, 8  
4102 OUGREE  
Tel : 32-(0)42526602  
[alexia.pironet@unisensor.be](mailto:alexia.pironet@unisensor.be)  
[www.unisensor.be](http://www.unisensor.be)

Mr Benoit GRANIER  
[benoit.granier@unisensor.be](mailto:benoit.granier@unisensor.be)

## WHO WE ARE

Unisensor is a Belgian biotech company strongly active in the agro-food industry.

Since its foundation in 1997, Unisensor has been developing rapid testing solutions for the food security. We have built a strong expertise in the detection of contaminants by means of a unique multiplexing approach.

Through our worldwide expansion, Unisensor has become a major player in the development of advanced technologies that ensure the quality of food.

Our products are available in more than 50 countries thanks to a network of local distributors.

## WHAT MAKES US DIFFERENT

Unisensor was founded with the ambitious aim to better serve the food industry and to protect the consumers.

**We meet** the farmer, laboratory and industry need with tailored products very simple to use and accessible to everybody. Our main activity consists in designing advanced and innovative diagnostic tools for this sector.

**We collaborate** with the most prestigious laboratories and industrial experts on a number of research projects to bring the cutting-edge technologies and achievements to the market.

We are more than just a diagnostic manufacturer: we take the opportunity to become even closer to the final user.

**VIGAN**

Rue de l'Industrie ,16  
1400 NIVELLES  
Tel : 32-(0)67895041  
[info@vigan.com](mailto:info@vigan.com)  
[www.vigan.com](http://www.vigan.com)

Mr L. CH. BEAUDUIN  
[lslt@vigan.com](mailto:lslt@vigan.com)  
[ndch@vigan.com](mailto:ndch@vigan.com)

**WHO ARE WE ?**

VIGAN manufactures bulk materials handling systems mainly:  
Mobile pneumatic conveyors or vacuators or grain pumps.  
Pneumatic continuous barge unloaders and mechanical barge loaders.  
Mechanical and pneumatic continuous ship unloaders for vessels up to post-Panamax.  
Mechanical loaders for any size of ships.

VIGAN capabilities include also complete turnkey projects for port terminal including ship unloading & loading, storage facilities and bagging operations.

**Looking for**

- Handling products in bulk with capacities from 50 to 1,500 metric tons per hour and/or
- Bulk handling and storage in ports

for any free flowing materials like cereals, grains, seeds, animal feed, alumina, petro coke, chemicals, industry raw materials, ...

## **WARZEE**

Tige de Buresse, 95  
5360 HAMOIS  
Tel : 32-(0)83612393  
[info@warzee-sa.be](mailto:info@warzee-sa.be)  
[www.warzee-sa.be](http://www.warzee-sa.be)

Mr Michel WARZEE  
[michel.warzee@warzee-sa.be](mailto:michel.warzee@warzee-sa.be)  
[thomas.cassart@warzee-sa.be](mailto:thomas.cassart@warzee-sa.be)

With over 25 years experience in the steel manufacturing sector, we have acquired a precise insight into your specific requirements concerning your agricultural and civil engineering machinery. Today we put this experience to good use, in order to help you, by developing efficient and reliable machinery.

### **Products**

Unrollers-spreaders  
Sweepers  
Bale wrappers

### **Manufacturing**

All stages of manufacturing are carried out on our production site, in Belgium:

- R&D
- Design
- Laser cutting
- Fabrication
- Paint application
- Assembly

Complete production control and our policy of only using high quality materials enables us to offer machinery that is reliable under all working conditions.

Mr Kris Beckers  
[kb@beckimpex.com](mailto:kb@beckimpex.com)  
Tel: 32 (0)495/28.77.39

Beck-impex imports New Holland machinery that has only been used for one year. These nearly new machines have been deployed in farms that renew their tractor fleets every year. This allows us to offer nearly new machines at a very sharp price.

Feel free to search through our catalogues:

- Tractors
- Telescopic Loaders

- Combines
- Parts
- Wheels and Tires
- Agri Machinery
- Forklifts and Trailers
- Sauermann coupling device

## ARTECHNO

Rue Herman Meganck, 21  
5032 ISNES  
Tel : 32-(0)81713400  
[info@artechno.be](mailto:info@artechno.be)  
[www.artechno.be](http://www.artechno.be)

Mr Xavier CLOQUET  
[x.cloquet@artechno.be](mailto:x.cloquet@artechno.be)  
[o.zaki@artechno.be](mailto:o.zaki@artechno.be)  
[x.fosseprez@artechno.be](mailto:x.fosseprez@artechno.be)

Since 1999, Artechno is a specialist in microbial solutions developed from fermentation of bacteria, yeast and fungi. Supported by more than 1,000 scientific papers, eco-friendly solutions are proposed to our partners to meet the challenges of healthy eating, of finding natural solutions in **animal feed** and **plant nutrition**. Artechno's know-how is particularly developed in SPORE FORMING BACTERIA (mainly BACILLUS species).

Innovation driven, Artechno proposes microbiological solutions for food supplements and people well-being, for animal nutrition and welfare, for vegetal nutrition and for environment quality. Artechno offers a wide range of pure strains, applied products and contract manufacturing services to its customers in the 5 continents.

### **Animal health and nutrition**

Animal breeding (aquaculture, poultry, pigs) challenges are profitability, sustainability, animal health and welfare, or environmental safety.

The innovative nutritional animal feed solutions proposed by Artechno helps our partners to succeed in these challenges.

- Aquaculture
- Breeding
- Pets

### **Vegetal health and nutrition**

Sustainable agriculture is developing and biobased solutions are part of the answer.

With biofertilisers (PGPR), Artechno brings eco-friendly quality products to the growers and the fertilizer manufacturers.

Plant growth promoting rhizobacteria (PGPR) are beneficial bacteria which have the ability to colonize the roots and to promote plant growth through direct action. They are associated with many plant species and are commonly present in varied environments.

Diversified populations of aerobic endospore forming bacteria, namely species of Bacillus, occur in agricultural fields and contribute to crop productivity directly or indirectly.

PGPR stimulate the plant growth directly through increase in nutrition acquisition, such as phosphate solubilization, or more generally by rendering the inaccessible nutrients available to the plants. Behind nitrogen, the essential mineral element that most frequently limits the growth of plants is Phosphate.

PGPR strains can promote plant growth and development mainly by the following means:

- Production of phytohormones
- Biological nitrogen fixation
- Solubilization of mineral phosphates and other nutrients
- Production of siderophores that chelate iron and make it available to plant root
- Promotion of mycorrhizal functioning

Mr Thierry PICAUD  
[thierry.picaud@medinbio.com](mailto:thierry.picaud@medinbio.com)

### **OUR PRODUCTS**

Medinbio has a pilot plant and industrial ultrasonic extraction equipment that produces high quality standardized plant extracts.

With our **prebiotics concept**, applied to the soil, we offer improved fertilizers for horticulture and agriculture.

Our products fall into 3 main categories :

**Prebiotics** to encourage bacteria  
**Basic substances** approved by the EC.  
For example :  
- Concentrated decoction of horsetail  
- Salicin

**Plant extracts :**  
- Fermented and dried plant extracts  
- EC FERTILIZER 2003/2003 and foliar fertilizer

### **NESTAAN**

Rue du Bois des Hospices,2  
7522 BLANDAIN  
Tel : 32-(0)69778320  
[infonestaan@nhb.be](mailto:infonestaan@nhb.be)  
[www.nestaan.be](http://www.nestaan.be)

Mrs Frédérique VAN NES  
[frederique@nhb.be](mailto:frederique@nhb.be)

**Vermiculite** is an excellent product to be used in horticulture. It can be used as a medium for the germination of seeds, where the combination of entrapped layers of air and the moisture retention

capacities ensure an easy and homogeneous germination of seeds and any rotting of the early root development is avoided.

For its **vermiculite**, Nestaan possesses an RHP certification. With the RHP-certification we can ensure everybody active in the horticulture that the Nestaan vermiculite is a safe, clean and quality product!

**Perlite** is a volcanic stone and has a whitish appearance and exists out of quite small and very light particles.

It is a 100% environmentally friendly, natural product.

PERLIGRAN® is mixed in growing substrates but is also suitable as a substrate for hydroculture and culture systems.

It has a very low volume weight, it is totally incombustible and non toxic.

It will definitely not rot, is completely free of any pathogens and is not attracting any vermin or pest.

Furthermore, PERLIGRAN® is Ph-neutral, inorganic, sterile and odourless.

When mixed in a growing substrate, PERLIGRAN® ensures an excellent balance between water and air as it improves the structure of the substrate and is very easy to use.

The product is controlled by RHP and has a FIBL quality. The raw material comes straight from the renowned Milos mine, famous for its quality crude perlite.

#### **FERTILISERS / HORTICULTURE**

Phosphorus is essential to plant life.

For horticultural uses, Prayon offers a full range of water soluble fertilisers:

- micronutri Fe
- MAP & MKP anticalc
- Pbooster

- monoammonium phosphate (MAP)
- monopotassium phosphate (MKP)
- potassium nitrate
- calcium chloride

Commercialized under the Hortipray® brand name, these fertilisers are suitable for fertirrigation. They supply fruits, vegetables, flowers and plants with optimal rates of nutrients in the most efficient way.

Prayon has developed a range of broadcast fertilisers for the agricultural sector. These fertilisers meet field crops' nutritional requirements in terms of phosphate fertilisers and binary fertilisers containing nitrogen and phosphorus.

**100 % Lombricompost végétal**  
Fertilisant universel à mélanger à votre sol

Mr Alexandre MEIRE  
[am@purver.be](mailto:am@purver.be)

Pur Ver is a company specialising in vermicomposting. This is a natural process in which composting worms attack organic matter (vegetables, cereals, etc.) and transform it into a natural, organic fertiliser. In practical terms, the mixture of compost and organic matter is spread over a surface where there are thousands of earthworms. This surface is watered regularly and maintained at the ideal temperature (between 20 and 30° C). Composting worms digest organic matter and their excrement becomes vermicompost, which is collected, dried and then sifted. This product is intended for everyone, as it can be used by professionals (potting soil producers), horticulturists and even home gardeners. Numerous agronomic tests have scientifically proven that plants receiving this PUR VER® fertiliser have better rooting, faster growth, higher yields and greater resistance to disease.

Who we are and what we do

We produce and sell high quality **fertilizers** in our home markets\* and outside Europe. We also collaborate closely with the distributor of our fertilizers in Europe, Borealis L.A.T, to serve our customers in the most reliable way.

We provide farmers with suitable fertilizers considering individual crop and soil conditions.

Embedded in the Base Chemicals business of Borealis, our aim is to strengthen our position in selected markets worldwide.

With a highly motivated and professional team, we are close to our customers in agriculture. Our backward and forward integration result in supply security as well as high product and service standards.

We provide products and solutions to help farmers achieve global food security for a growing population, sustainably. We work by looking at agriculture through the eyes of growers, and by applying world-class science to develop crop protection products and seeds.

Our innovations help farmers to overcome multiple challenges – from weeds, insects and disease, to the effects of heat and cold on crops. Whether they grow corn or rice, vegetables or coffee, farmers around the world trust Syngenta to help them produce healthy, premium crops and minimize the use of precious natural resources.

Mr Maurits BIELDERS

As a subsidiary of the Groupe Roullier, TIMAC AGRO BeLux makes quality products available to farmers and agriculture specialists. All our products are patented for their agronomic efficiency.

One hundred and fifty researchers within the Groupe Roullier, in partnership with prestigious universities as Gembloux and Gent, insure a constant innovation.

Thanks to its team of 20 technical salesmen ( ATC) on the ground distributed on the whole territory and in partnership with the agricultural distribution, TIMAC AGRO BeLux proposes to the farmers a listening, a follow-up and personalized advice, to meet the needs of every grower.

TIMAC AGRO BeLux stocks up, for the major part of its volumes, with its factory of Marchienne-au-Pont.

Mr Vincent CAMBIER  
[vcambier@viridaxis.com](mailto:vcambier@viridaxis.com)

VIRIDAXIS is a Belgian company specialized in mass production of **parasitoids** to control aphids in a natural way. It uses an innovative, plant-less technology to guarantee products of constantly high quality. VIRIDAXIS was formed in 2004 and now employs around 45 people. Large investments are made in R&D, where the focus is on practical, reliable pest control products. The main goal is to make agriculture more sustainable.

Our customers are mostly internationally and nationally operating companies active in the field of biological pest control.

[patrice.bauvin@yara.com](mailto:patrice.bauvin@yara.com)  
[www.yara.com](http://www.yara.com)

Mr Patrice BAUVIN  
[patrice.bauvin@yara.com](mailto:patrice.bauvin@yara.com)

Unlike most fertilizer companies, we offer a complete range of crop nutrition products.

Our fertilizers range from those based on the most widely needed nutrients – Nitrogen (N), Phosphorus (P) and Potassium (K) – to those incorporating growth and quality enhancing nutrients, such as calcium (Ca) and magnesium (Mg), to micronutrients that help prevent or cure deficiencies resulting from particular soil or crop conditions.

If crops lack any of these nutrients, yield and profitability are reduced. That's why we offer not only a product range that meets all crop nutrition needs, but also crop-specific advice and fertilizer management tools and services.

Field Applied Nitrogen Fertilizer
