PRODUCT INTRODUCTION

- Fresh or dried walnuts, not peeled (in the shell)

HS code: 080231

- Fresh or dried walnuts, shelled and peeled

HS code: 080232

Walnut kernels can be eaten raw or baked as a snack, but most walnuts are much more commonly consumed as an ingredient in cooking and food production than as a snack.

Walnuts in the Kyrgyz Republic are harvested in the largest natural walnut forest on the planet, Arslanbob, a legend whose truth is harder to crack than the nuts themselves.

Unique walnut forests of Arslanbob — a natural forest that arose in ancient times at an altitude of 1700 m above sea level. Its area is about 608,500 hectares, and this huge territory is home to numerous walnut trees, some of which are more than 1000 years old, reach 30 meters in height and 2 meters in diameter, and each of them brings from 200 to 400 kilograms of nuts every year. Walnut kernels are rich in valuable nutrients and have a unique taste of naturalness.

REASONS TO BUY

- **1700 M ABOVE SEA LEVEL**
- **608,500 HA OF WALNUT RELICT FOREST**
- **UNIQUE TASTE OF NATURALNESS FROM 1000 YEARS AGO**

TESTIMONIALS

MAHMOUD ALABUKATO
Al Tahaluf Food & Trading Co.

KYRGYZ WALNUT is unique in its taste and is suitable both as an ingredient for further cooking of other food products and for direct consumption of the nut itself. And the kernels of the nut have enough fat content that allows you to store it for a long time.
